

Is there a steel anti-jemmy device fitted on all window opening sections?

Handles are very important. They must be functional and look good. Make sure the window handles match the door handles in design, style and colour. (Cheaper companies ignore this - the handles not only do not match in design, the colour can be miles out, particularly on gold furniture). So make sure you get 100% matching handles.

Are the handles, hinges and locks also approved by the Police and covered by a 'Secured by Design' Licence? (Ask to see a copy)

Are the hinges used on the windows stainless steel and high security hinges?

**It is important that you make the right decision. If the products are for your own home, you will have to live with the choice you make for many years to come.**

**This leaflet is designed to help you with your choices. It is genuine. We have found it necessary to publish this because we believe we produce the best products currently available in the market place - most other companies do not!**
