

High Security PVCu Stable Door

The 'benchmark' for stable door technology

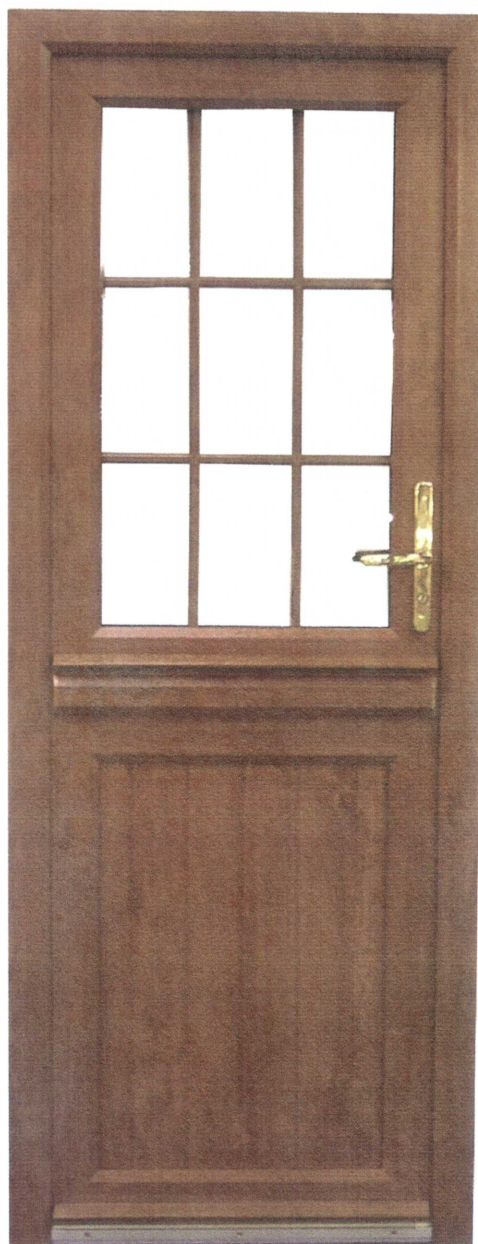

The unrivalled, 'Duration' PVCu Stable Door is no ordinary double glazed door.

With a choice of five finishes, three styles and numerous options of panels and glazing, it is probably the most versatile door money can buy!

Manufactured from the finest materials the 'Duration' PVCu Stable Door is second to none. Because of its UNIQUE HIGH SECURITY SYSTEM to both top and bottom sections the 'Duration' Stable Door is considered to be more secure than many conventional PVCu double glazed entrance doors.

Unlike cheaper imitations, the 'Duration' Stable Door is manufactured to the highest standards from top quality fully reinforced PVCu and has passed the rigorous testing of 'Fullex' one of the worlds leading quality, high security lock manufacturers.

**Security isn't
expensive it's
priceless!!**

High Security PVCu Stable Door

The 'benchmark' for stable door technology

The introduction of PVCu Stable Doors to the double glazing industry was a great idea, but Duration Windows has taken it one step further.

Duration Windows worked alongside "Fullex Hardware" to achieve the certification of producing one of the most secure stable doors on the market to date.

Features and Benefits:

- Our Stable Door locks are stamped with the "Police Preferred Specification" Logo.
- The Stable Door has been approved by the Association of British Insurers.
- The Hi Tensile steel hooks of the "Fullex Lock" have been tested to 6½ Tonnes.
- The Hi Tensile security "keeps" capture the internal security bar.
- The "Fullex Lock" has two 12mm weather-sure bolts
- The "Fullex Lock" incorporates two latches
- The "Fullex Lock" has two dead-bolts
- The "Fullex Locking Mechanism" is manufactured in the UK with precision engineered lock components
- Two hinge bolts are available on request.
- The Handles used on our Stable Doors are fitted with a two part fixing and provides extra security, as the handles will resist being forcibly removed.
- The cylinders used on our Stable Door are flush fitted with the handle housing so they resist being forced out.
- The cylinders also have an offset cam so they resist being punched out.

The Picture above shows our Dura-Blinds fitted into our showroom Bi Folding Door System
Ideal for use in our Stable Door

Seven - point locking system

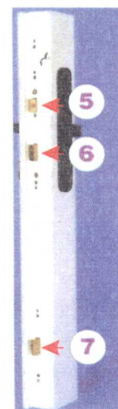

Top Sash

Bottom Sash

High Security Hook-lock

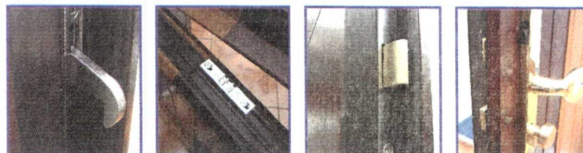

NB: The handles illustrated may not be representative of the handles fitted.
